

WEB CARTOGRAPHY

Topics & tasks

Topics:

- 1.- Web resources for making maps 1: base maps
- 2.- Web resources for making maps 2: thematic data and thematic atlases, maps and collections
- 3.- Brief history of the Web and HTML language.
- 4.- Basics of HTML language: Basic characteristics of HTML5. Internal structure of the HTML files and its components. File heading, HTML tags in the heading. Brief description of CSS and JavaScript. Main HTML tags (IMG, TEXT, A HREF, TABLE, DIV).
- 6.- Definition and characteristics of an image map, HTML tags needed for its programming. Use of image maps in websites related to Cartography: advantages and disadvantages.
- 7.- Preliminary steps to make an image map: re-edition of vector files & conversion to raster format.

Topics:

- 8.- Classification of HTML editors, practical presentation of free software, apps and Web-based editors.
- 9.- Free software and websites to make image maps.

- 10.- Newest map-based solutions on the Web: The Google World, Google-based collaborative cartography: Making a map using Google apps (Google My Maps)
- 11.- Cloud-based thematic mapping applications

Task:

Making of a website:

- Presentation of a selected territory and theme on a general map, using an ***image map***.
- Connecting information to the general (main) map using ***image map*** tags: more detailed annexed maps, data, information (texts, images, videos, etc)
- Making of a Google-based map using ***Google My Maps*** or ***a thematic map using an application online***. The map should be related to the main topic of the website and it should be inserted to the website.

Bibliography:

- Websites and books on HTMLlanguage. Pl.:
 - *The ultimate HTML Reference (Ian Lloyd 2008) SitePoint Ltd*
 - *HTML(5) Tutorial [Online] Available at <http://www.w3schools.com/html/default.asp>*
- Web -based HTML applications and free software, websites for making *image maps*
- Google My Maps:
(<https://support.google.com/mymaps/?hl=en#topic=3188329>)
- *DataWrapper ???*
<https://www.datawrapper.de/faq/>
- Powerpoint presentations

WEB RESOURCES FOR MAKING MAPS 1: BASE MAPS

Intentionally:

- **Google Maps**
- **Google Earth**
- **Open StreetMap**
- ...

were left out from this presentation (almost entirely ☺)

Photos of the country

CIVERTAN Bt. (<http://www.civertan.hu>)

The screenshot shows the homepage of CIVERTAN GRAFIKAI STUDIO. The header features a red background with abstract white and grey geometric shapes. The CIVERTAN logo, consisting of a stylized square pattern above the text "CIVERTAN" and "GRAFIKAI STUDIO", is centered. A navigation bar on the left includes links for "Bemutatkozás", "Grafikai stúdió", "Fotó / Galéria", "Légi fotó", "Játékkártyák", "Könyv, látványterkép", and "Fotó archívum". Below this is a "WEBÁRUHÁZ" button and a "KAPCSOLAT" button. The main content area features a night photograph of a large, illuminated building complex and a central monument. Text below the photo reads "Új weboldalaink: www.legifoto.com és www.legifelvetel.hu". To the left is a thumbnail of a map titled "Elfeledett Váraink látványterkép" with a red "ÚJ" badge. To the right are logos for "Orfű Tej" (with a cow illustration), "STÍLU GALÉR" (with a stylized letter S), and a section titled "KIRÁNULÁSI HELYSZÍNEK SZÍNES GRAFIKÁKON" showing small maps of various locations.

Önnek is készítünk légi felvételt, kérjen árajánlatot a fenti e-mail címen!

A Civertan légitó ajánlata

A közel 500.000 légi felvétel bizonyítja, szeretjük fentről látni hazánkat. Talán azért, mert felülről minden más. Ajánljuk légből kapott képeinket mindenazonknak, akik már bejárták hazánk minden zegét-zugát, és azoknak is, akik még nem ismerik Magyarországot. A légitó archívumban szereplő képek megrendelhetők.

A felvételeket digitális adathordozón (CD, DVD) adjuk át Önnek, amennyiben az adott épületről, területről új "repülő kamerával" készített képeket szeretne, érdeklődése esetén egyedi árajánlatot dolgozunk ki.

Base maps on the Web

Difficult to find free downloadable (map) databases with good cartographic quality on the Web...

However, there are valuable websites:

- Collections of links to cartographic or map websites
- Websites offering high-quality base maps (or simple maps) of specific territories, countries, etc.
- Databases
- Interactive websites for map making (majority of them uses Google Maps or similar web-based map services)

Harvard Geoportal

The screenshot shows the Harvard Geospatial Library (HGL) Geoportal homepage. At the top, there is a navigation bar with links for HARVARD LIBRARY, SEARCH & FIND, HOLLIS+, HOLLIS CLASSIC, JOURNALS, DATABASES, LIBRARIES / HOURS, ALL MY ACCOUNTS, and ASK US. The HGL logo is prominently displayed. Below the navigation bar is a search interface with two input fields: 'Where:' (Example: Boston, MA) and 'What:' (Example: buildings), followed by a 'Search' button and an 'Advanced Search' link. To the right of the search fields is the text 'HarvardGeospatialLibrary'. The main content area features a world map with various geographical labels in multiple languages (e.g., AMÉRIKA, EURÓPA, AFRIKA, DÉL-AMERIKA). A large blue callout box in the center-left contains the word 'Welcome' in white text. Below it, a message reads: 'There are two ways to begin your search:' followed by two numbered steps: '1. Enter information using one or both search fields.' and '2. Zoom in on a location using the map.'. At the bottom left of the callout box is a checkbox labeled 'Do not show again'. On the far left, the word 'google' is partially visible. On the far right, there is a scale bar indicating '5000 km / 2000 mi' and the text 'Általános Szerződési Feltételek'.

Welcome

There are two ways to begin your search:

1. Enter information using one or both search fields.
2. Zoom in on a location using the map.

The screenshot shows the homepage of the Caribbean Environment Programme (CEP) Interactive Map. At the top, there is a navigation bar with links to Contact Us, Staff Directory, Vacancies & Internships, and UNEP Home Page. The main header features the CEP logo and the text "The Caribbean Environment Programme" and "Protecting our Caribbean Sea and Sustaining our Future". Below the header is a menu bar with links to Home, Cartagena Convention & Protocols, About Us, Meetings & Events, Publications & Resources, and Media Room. A search bar is also present. The page title is "Interactive Map". The main content area contains a map of the Caribbean region, showing bathymetry in purple shades. The map includes labels for Florida, Cuba, Jamaica, Hispaniola (Dominican Republic and Haiti), Puerto Rico, and several Central American countries (Belize, Guatemala, Honduras, El Salvador, Nicaragua). On the left, there is a sidebar with a catalog section containing dropdown menus for "Project Name" (set to "Select"), "Theme Layers" (with options like Bathymetry, Elevation, Land Cover, Population density, Soil types, Catchments, and Exclusive Economic Zones), and "Regional Geo-Layers". There are also buttons for "Terrain Google!" and "Satelite Google!". The right side of the map interface includes user login fields for "User" and "Password" and a "Login" button. The bottom of the map displays a copyright notice: "Térképadatok ©2011 Europa Technologies, Google, INEGI, LeadDog Consulting - Használati feltételek".

International Programs

The U.S. Census Bureau conducts demographic, economic, and geographic studies of other countries and strengthens statistical development around the world through technical assistance, training, and software products. For over 60 years, the Census Bureau has performed international analytical work and assisted in the collection, processing, analysis, dissemination, and use of statistics with counterpart governments in over 100 countries.

Select Topics in International Censuses

Leading up to the global 2020 round of censuses, the U.S. Census Bureau is releasing a series of technical notes. These documents will assist staff at national statistical offices by addressing some of the most pressing census issues. [Learn more](#)

About us Data Projects Partners Products Help and hints

General Bathymetric Chart of the Oceans (GEBCO)

GEBCO's aim is to provide the most authoritative, publicly-available bathymetry for the world's oceans. It operates under the joint auspices of the Intergovernmental Oceanographic Commission (IOC) and the International Hydrographic Organization (IHO).

GEBCO's data sets comprise two global gridded bathymetric data sets, the **GEBCO_08 Grid** and **GEBCO One Minute Grid** and a global set of digital bathymetric contours, coastlines, trackline control information. The data sets are maintained and updated at BODC.

The GEBCO One Minute Grid and GEBCO_08 Grid are [available to download](#) from the internet. The full set of GEBCO's data sets are included in the **GEBCO Digital Atlas** (GDA) along with accompanying documentation and a software interface for viewing and accessing the data sets.

Overview Activity Roadmap Issues News Wiki Documentation Download Developer Oversight Forums

Search:

IMPORTANT: GMT development has moved to Github

GMT development has moved to the Github repository [GenericMappingTools/gmt](#) starting in August 2018. This site will remain operational for the near future but any code contributions or checkouts should be done from Github instead. We appreciate your patience as we transition to this new platform and hope that it will make contributing to GMT easier in the future.

New issues should be reported at <https://github.com/GenericMappingTools/gmt/issues>. You'll need to register for a free Github account, if you don't have one already. Registration on this wiki does not work due to reCAPTCHA problems.

IMPORTANT: Registration for the forum is broken

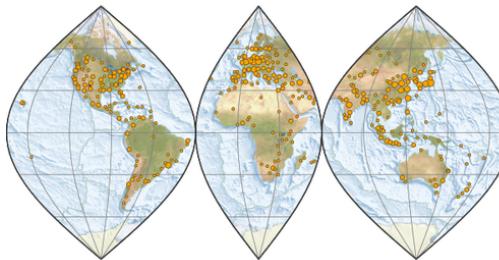

Currently, new users will not be able to create an account because of a problem with the reCAPTCHA system. We're aware of the issue but it cannot be easily solved. Instead, we're working on a new forum solution. Please be patient as we work through this. If you have a question, please ask one of the developers to create an account for you by posting an Issue to Github (see above). **Make sure you include the following details:**

1. Desired user name
2. Contact email
3. Your full name

What is GMT?

GMT is an open source collection of about 80 command-line tools for manipulating geographic and Cartesian data sets (including filtering, trend fitting, gridding, projecting, etc.) and producing PostScript illustrations ranging from simple x-y plots via contour maps to artificially illuminated surfaces and 3D perspective views; the GMT supplements add another 40 more specialized and discipline-specific tools. GMT supports over 30 map projections and transformations and requires support data such as [GSHHG coastlines](#), rivers, and political boundaries and optionally [DCW country polygons](#). GMT is developed and maintained by Paul Wessel, Walter H. F. Smith, Remko Scharroo, Joaquim Luis and Florian Wobbe, with help from a global set of volunteers, and is supported by the [National Science Foundation](#). It is released under the [GNU Lesser General Public License](#) version 3 or any later version.

Google, INEGI - Terms of Use

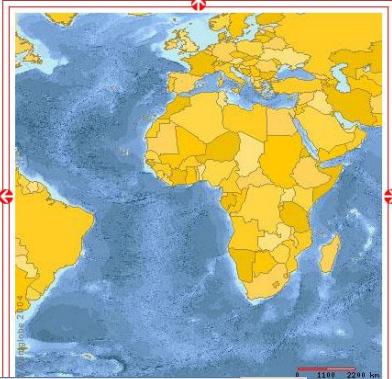

The screenshot shows the Click2Map Editor interface. On the left, there's a map of Mexico with several cities labeled: Tizimin, Cancun, Merid, Valladolid, San Miguel, and Chetumal. A scale bar indicates 100 miles and 100 kilometers. On the right, there's a terrain map showing parts of Central America and South America, specifically highlighting countries like Mexico, Belize, Guatemala, Honduras, El Salvador, Costa Rica, Panama, Colombia, Venezuela, and Ecuador. The main window has a toolbar at the top with various icons for logging in, adding maps, creating groups, markers, drawings, bulk operations, managing databases, publishing, libraries, and help. Below the toolbar, there are buttons for 'New Map', 'Edit Map Properties', and 'Markers clustering options'. A central dialog box titled 'Edit Map Map1' is open, showing the 'Default Marker Properties' tab. Inside this dialog, another smaller window titled 'Default Marker Info' is displayed, showing an 'Icon Set' collection named 'Tourism & Nature'. This icon set contains a grid of green icons representing various tourism and nature-related symbols like landmarks, animals, and landscapes. There are also buttons for 'Type' (set to 'Text'), 'Icon' (selected), 'Add Icon', and checkboxes for 'Use Template' and 'Template:'.
